

## **CAR TO GO Corporate Memberships**

**Easier. Faster. Cheaper.**

---

### **What is CAR TO GO?**

**CAR TO GO** provides its members with access to a fleet of vehicles parked around Aspen. Cars are owned, maintained and insured by the City of Aspen. Both individual and corporate memberships are offered.

### **What is a corporate membership?**

A **CAR TO GO** corporate membership is a low cost, time-saving alternative to owning and operating a company fleet and/or managing a mileage reimbursement program. With a corporate membership, your business can access a fleet of small and mid-size sedans, SUV's and even a pickup truck. Use the cars for meetings or site visits. You can even allow your employees to use the cars for their personal errands, as an inexpensive perk.

### **How do my employees access cars?**

Once you've become a corporate member, interested employees will need to complete a short application and orientation. Vehicle reservations are take just seconds and can be made via internet or phone.

### **How much does it cost?**

It costs only \$10/month to provide a **CAR TO GO** membership to all of your employees. Once you're a member, you'll be invoiced only for the hours and miles used by your employees. Gas, maintenance, insurance and roadside assistance are all included in [our low rates](#).

### **How is it invoiced?**

**CAR TO GO** invoices members monthly. Invoices are detailed, showing you which employee used a vehicle at what time and where they went. In addition, a convenient trip coding is available, which allows you to expense trip costs to a job or client.

### **What about employee personal use?**

**CAR TO GO** offers free monthly memberships to employees of its corporate accounts. This means that, by opening a corporate account, you can provide your employees with a great benefit at a low cost. Employee personal use can be paid by your business, or invoiced directly to your employee using or trip coding system.

### **How can I get going?**
